Vyapar Partner Suite

Official User Guide & Operational Manual

Version 3.18 • Enterprise Edition

1. SYSTEM EXECUTIVE OVERVIEW

The **Vyapar Partner Suite** is a single-file automated client acquisition, multi-script WhatsApp outreach, and niche email marketing platform. Engineered specifically for Vyapar Channel Partners, Field Reps, and Agency Resellers, it streamlines lead capture from paper brochures, visiting cards, and voice inputs while enabling 1-click conversion workflows.

2. AUDIENCE PERSONA OPERATIONAL GUIDE

👨‍💼 Field Sales Representatives

Primary Goal: Capture lead data instantly at counter-side visits and trigger immediate welcome scripts.

- Use **Voice Wizard** for hands-free entry while talking to shopkeepers.
- Use **Scan Card** to parse visiting cards in 5 seconds.
- Send instant WhatsApp messages on the spot.

🏢 Partner Operations Managers

Primary Goal: Maintain list cleanlines, track conversion pipelines, and export database state.

- Filter leads by **Niche** and **Status**.
- Perform bulk **CSV Imports/Exports** for CRM sync.
- Monitor conversion rates in the top stats bar.

3. STEP-BY-STEP CORE WORKFLOWS

Workflow A: Bulk Lead Import via CSV

1. Click the **Import CSV** button in the top navigation header.
2. Select your `.csv` file containing lead rows.
3. The engine automatically standardizes columns (Name, Business, Phone, Email, City, Niche, Status).
4. Imported leads are immediately prepended to your CRM list and synced to local storage.

Workflow B: OCR Visiting Card & Brochure Scanner

1. Click **Scan Card / Brochure** on the CRM tab (or capture directly via mobile camera).
2. Verify photo clarity in the **Card Verification Modal** and click **Process Card**.
3. The Tesseract engine extracts phone numbers, emails, brand names, cities, and maps SME niches automatically.
4. Review the auto-filled lead record in your active CRM feed.

4. SME NICHE CATEGORIZATION MATRIX

Target Industry Niche	Key Business Pain Point	Automated Email & WhatsApp Angle
Retail & Kirana	Long checkout lines, missing items	Mobile POS thermal billing & barcode scanning focus
Pharmacies	Medicine batch expiries & drug loss	30-day automated expiry alerts & batch billing
Wholesalers	Delayed party debt collections	WhatsApp payment links, e-invoicing & credit ledgers
Services & CAs	Manual quotation to invoice steps	1-click GST filing, quotes-to-invoice conversion

5. MESSAGE STUDIO & PITCH TEMPLATE SWITCHER

The **Message Studio (Tab 2)** allows partners to switch between specialized pitch scripts instantly, matching the prospective business owner's industry.

> **Using the Pitch Script Switcher:**
> - Select a preset script from the dropdown menu (e.g., 🛒 *Kirana & Retail Pitch*, 💊 *Pharmacy Expiry Pitch*, or ⏳ *24h Follow-up*).
> - The message editor updates instantly and syncs with the live **WhatsApp Mobile Preview Pane**.
> - To save custom copy: Edit the text, click **Save New**, name your template, and store it for future sessions.

6. DYNAMIC COPY REPLACEMENT TAGS

The messaging engine automatically replaces dynamic brackets during direct dispatch or queue execution:

Variable Tag	Data Source	Rendered Output Example
`{{owner_name}}`	Lead Name field	Pramod Singh
`{{business_name}}`	Business / Shop field	Buddha Travel DMC
`{{partner_link}}`	Configured Referral Code	`https://vyaparapp.in/?referrer_code=ZNNQ2XK`

7. SEQUENTIAL QUEUE DISPATCHER (TAB 3)

For high-volume outreach campaigns, use the **Queue Dispatcher** to process your filtered leads list sequentially without manually scrolling through CRM rows.

1. Prepare Campaign Queue

Filter your CRM list by target Niche or Status (e.g., "New" Pharmacies). Navigate to **3. Queue Dispatch**.

2. Execute One-Click Dispatch

Click **Open WhatsApp & Mark Contacted**. The app opens WhatsApp Web with pre-filled text and updates lead status automatically.

8. AUTOMATED NICHE WELCOME EMAIL ENGINE

Clicking the email icon () on any lead row launches the default system email client pre-populated with an industry-specific growth guide and your embedded partner link.

- If no email address is present, the app prompts you to enter one and updates the CRM record on the fly.
- Outbound emails automatically transition lead status from `New` to `Contacted`.

9. TROUBLESHOOTING & DATA SAFETY CHECKLIST

Symptom / Operational Need	Recommended Action & Solution
Visiting Card text blurry	Retake card photo using the modal preview; ensure adequate lighting and horizontal alignment.
Moving between devices	Click **Export CSV** to save your leads database, then click **Import CSV** on your secondary device.
Voice Wizard silent	Ensure browser microphone permissions are enabled for web SpeechRecognition.
Clearing local cache	The app persists data via browser `localStorage` (`vyapar_partner_leads`). Export CSV regularly for offline backups.
